### REPORT 818 FUND SOURCE 1 REPORT

**PAYROLL** 

PURPOSE:

The purpose of this report is to provide information related to the expenditure of Fund Source 1 dollars and man-hours during the current pay period as well as the current FTE Fiscal Year to date. This information is needed by budget and manpower analysts for reporting actuals and for making projections in order to manage both the budget and the manpower allocations. The FTE Fiscal Year is defined as beginning with the pay period covering the first of October and ending with the accumulation of 26 pay periods thereafter. When run for Fiscal Year 1995, the start date will be 10/2 instead of 10/1.

The ability of this report to meet the purpose intended by the user community is limited as follows: Adjustments are made by payroll to the current pay period due to changes in prior pay periods (prior pay periods are not adjusted—NPPS does not support retroactive processing). These adjustments can be for prior fiscal years. Identification of which prior pay period caused the adjustment is not available. Only those data elements that affect the employees' pay or benefits or those elements that are essential to payroll for other accounting are adjusted. In some cases, only accumulated elements are adjusted. Payroll elements are accumulated for the leave year or the pay year, according to payroll needs, and are never accumulated for the FTE fiscal year; therefore, the accumulated data cannot be used for this report, and accumulating the biweekly pay period data will not include the adjustments. Example: LWOP: Used B/W, which is used in several lines to accumulate LWOP hours. Payroll makes adjustments to accumulated LWOP data fields, never to the LWOP: Used B/W field. Another problem in the use of the biweekly LWOP data exists because NPPS does not accommodate partial pay periods for other than new hires and terminations that have matured. When an employee is hired, is terminating, or is changing from PT to FT or vice versa, and the action has not matured from personnel by the time payroll must complete the time & attendance information, the pay period will have as many LWOP hours as needed to make the period hours equal 80. These LWOP: Used B/W hours are never changed; only the accumulated LWOP hours are adjusted in the next pay period.

Other limits to its usefulness include (1) if an active NASA employee is not paid through NPPS; i.e., employee is located out of the country and is paid through the State Department, the report reflects employee as LWOP, specifically showing up as "employees not paid" and "Incidental LWOP," and (2) since a lot of the items in the report are specific-NOAC driven, the use of a 991 NOAC to change personnel fields that affect lines and columns is a problem. For example, if a 991 NOAC is processed to correct position type (to a value that crosses columns) in a different pay period from the original action, the B/W report which should reflect the original action will be wrong. If the personnel actions history is corrected, however, the YTD report will be correct.

The FUND SOURCE 1 report can be produced for different time periods-biweekly or FTE YEAR-TO-DATE and within the selected time period for different populations: CSRS only, FERS only, OTHER than CSRS/FERS, and total of all employees. The default is BIWEEKLY for all employees. The FTE report is always for all employees. Use a heading of BIWEEKLY FOR the current pay period or FTE YEAR-TO-DATE for the entire pay year; and display the pay period dates and number.

#### SELECTION CRITERIA:

Installation code equals user designated center code or Agency.

BIWEEKLY: Read the PAY-MASTER and PER-HISTORY files for the current pay period.

CSRS only = retirement plan 1, 6, C, E, R, T

FERS only = retirement plan K, M, N

OTHER than CSRS/FERS = retirement plan equal 2 or 4 TOTAL of all employees = reactivation indicator not equal 3

### FTE YEAR-TO-DATE: (always all employees)

Read the data from the PAY-HISTORY file and match it with the PER-HISTORY file. Use the Position Type, Pay Plan, CO-OP Degree Level, and Organization: Assigned from the personnel history transaction reflecting the personnel information in effect at the end of each Pay Period. If Pay Period start and end months are less than 10, reduce the year by 1 to start at the pay period that spans OCT 1 of the prior year (fiscal year 1995 starts on 10/2). Always display the accurate start and ending pay period dates.

ORGANIZATION: Assigned equals one of the following user designated selection options:
